Hi Chris,

We're getting in touch to inform you that your access to Mixcloud Live has been temporarily restricted, and you'll currently be unable to stream to your profile <https://www.mixcloud.com/DelCristo/>.

Please review the information in this email carefully to understand why this feature has been temporarily restricted and how to re-enable live streaming on your profile.

We're committed to keeping Mixcloud a fair, legal, and safe platform for all creators and listeners. In line with these commitments, there are some rules we must enforce that apply to Mixcloud Live, which you can read more about in our [Terms of Use](#) and [Community Guidelines](#).

Mixcloud is a user-generated content platform, where creators can share DJ sets, radio shows and other musical content.

Mixcloud Live can be used to broadcast music-focused content. We identified that the Live stream on 21 November at 16:20 was not music-focused, and we've taken action to disable your stream.

In line with our [Three Strike System](#), we must inform you that this will be counted as your First Strike. Please be aware that further breaches of our terms may result in further strikes or the removal of your profile from our platform.

We appreciate your understanding and hope this information helps to avoid any accidental breaches of our Terms and Community Guidelines in your future streams.

If you would like to continue streaming on Mixcloud Live and agree to abide by our terms, please reply to this email and we'll remove the restriction as soon as possible so you can start broadcasting again.

Thanks again for your understanding, and we look forward to hearing from you.

Thanks,

Sophie
Product Support Specialist
